

Arushi Taneja

(608) 960-6392 | ataneja2@wisc.edu | [linkedin.com/in/ataneja2](https://www.linkedin.com/in/ataneja2) | github.com/arushi0207

SUMMARY

Motivated **software engineer** and **data science student** with hands-on experience in **full-stack development**, **AI/ML pipelines**, and **scalable backend systems**. Skilled in **.NET**, **React/React Native**, **Python**, **SQL**, and cloud platforms like **Azure** and **GCP**. Known for **building production-ready tools**, improving **developer workflows**, and delivering **reliable, high-performance systems** in research and industry settings.

EDUCATION

University of Wisconsin - Madison

Madison, WI

B.S. Computer Science and Data Science

Anticipated graduation May 2026

- **GPA:** 3.54/4.00
- **Relevant Coursework:** Algorithms, Operating Systems, Machine Organization, Data Science Modeling, Java Programming, Data Science Programming, Computer Graphics, Software Engineering, Artificial Intelligence, Database Systems, Building User Interfaces

EXPERIENCE

Software Developer Intern | *C#, UWP, .NET, Azure, MSSQL, MVVM*

June 2025 – September 2025

365Labs

Baton Rouge, LA

- Built an automated PDF-extraction + LLM/OCR pipeline that reduced manual report-entry time 60%.
- Developed a JSON-based heuristic mapping engine that cut template-creation time 50% and improved configurability.
- Engineered new RMS modules for multi-state IBR/NIBRS compliance, improving cross-jurisdiction data validity.
- Added state-specific validation + unit tests, reducing pre-deployment defects 30%.

Undergraduate Research Assistant | *Javascript, React, Firebase*

September 2024 – May 2025

Magic Lab, University of Wisconsin - Madison

Madison, WI

- Rebuilt real-time motion-capture syncing with Firebase, cutting crashes and improving data stability by 40%.
- Built a custom tweening engine for smooth pose transitions, enhancing frame stability and gesture-model responsiveness.
- Developed a dynamic in-app script editor enabling researchers to prototype interactive narratives without runtime issues.
- Collaborated in Agile sprints with researchers and developers to deliver iterative accessibility and stability improvements.

Data Science Programming II Peer Mentor | *Python, Git, UNIX, Flask, Selenium*

March 2025 – Present

University of Wisconsin - Madison

Madison, WI

- Mentor 300+ students in Python development and debugging, improving assignment completion and overall code quality.
- Teach debugging, data-structure design, and A/B testing strategies to strengthen analytical thinking in data workflows.
- Standardize Git and virtual environment workflows, increasing reproducibility and version-control adoption.
- Adapt explanations to diverse learning styles to create an inclusive and effective technical learning environment.

PROJECTS

Qualcomm Capstone Project | *Python, Computer Vision, PyTorch, ONNX Runtime*

September 2025 – Present

SpeakEasy. AI-Powered Feedback Coach

- Built full on-device AI system for posture, gaze, gesture, and expression analysis using Qwen2-VL and custom evaluators.
- Converted/Optimized large vision-language models to ONNX Runtime, improving inference stability and lowering latency.
- Developed a scalable video-analytics pipeline (frame sampling, feature extraction, scoring) with multimodal labels and a 0–100 engagement metric.
- Improved UI and workflow with annotated previews, analysis overlays, and debuggable evaluation reports.

Driver's Application | *Javascript, ReactNative, Expo, Azure, MSSQL*

December 2024 – Present

- Leading development of a real-time task-management app for truck drivers to streamline proof-of-delivery workflows.
- Built a full-stack system with a React Native frontend and REST API backend connected to an Azure MSSQL database.
- Integrated secure document upload via Azure Blob Storage, reducing proof-of-delivery data loss by 40%.
- Launched the application on the iOS App Store, gaining real-world users and production usage.

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python, C#, JavaScript, SQL, HTML/CSS, TypeScript

Frameworks & Libraries: .NET, React, React Native, PyTorch, SpringBoot, Pandas, NumPy, MediaPipe, JUnit, Bootstrap

Tools & Platforms: Azure, Google Cloud Platform, Microsoft SQL Server, Git, Docker, VS Code, Visual Studio, IntelliJ

Core Strengths: Algorithms, distributed systems, scalable infrastructure, relational databases, performance optimization, debugging, test-driven development, cloud-based infrastructure, version control & CI/CD, Agile & Scrum Development
